

Adding an Authenticator

To add an authenticator to a sub-user, click the **Add Authenticator** button.

The New Authenticator screen will be displayed. The following fields are required:

- Nickname
- Serial Number
- Current Code

Authentication settings can be set prior to saving.

NEW AUTHENTICATOR ✕

NICKNAME required

The nickname is how the authenticator will be referenced elsewhere throughout the system.

SERIAL NUMBER →

Choose an authenticator from the list assigned

CURRENT CODE required

Enter the code displayed on the authenticator

Require on Login

Requires additional authentication for a sub-user when logging into digital banking

iPay Subscriber

Requires additional authentication for a sub-user to manage the Bill Pay profile

iPay Payee

Requires additional authentication for a sub-user to add or modify a Bill Pay payee

SAVE

Once all changes have been made, click the **Save** button.
